SELECTED PUBLIC WORK | OCTOBER 2026

Ahmadreza Samadi

Also Ahmad Samadi | Dubai-based technology entrepreneur

Start with the decision.

Co-Founder & Technical Lead, Appraiva - Cleveland, Ohio; remote from Dubai.

Co-Founder & CEO, Royal Abraj Group - Dubai.

AI workflow cost ledger

Count every attempt, retry and failure, then divide total recorded costs by distinct caller-accepted results. Includes a CLI, workbook and fictional worked examples.

Caller-supplied acceptance and costs; no independently verified quality or company benchmark. Native spreadsheet recalculation is unverified.

Open code, workbook and examples >

Metro rent burden

Explore rent-burden estimates for 386 US metros using ACS 2024 data, with a reproducible CSV, chart, field guide and Excel companion.

Computable renter-occupied units only. Nested 30%+ and 50%+ thresholds; no property yield or significance-tested investment ranking.

Open data, method and downloads >

Video publication-date linter

Check local video JSON-LD and optional sitemap dates offline. Version 0.1.1 avoids repeated scans through equivalent paths and leaves source files unchanged.

Local syntax and consistency checks do not establish actual publication, indexing or rankings.

Open the version 0.1.1 release >

Which Dubai property source fits the question?

Choose between a sales-price index, rental benchmark and a separate valuation service before interpreting a property number.

Educational analysis, not an appraisal, legal ruling, official endorsement or claim of first-hand product testing.

Read the source-selection guide >

Prepared with AI assistance. Examples labelled fictional are not company results. Publication does not establish client adoption or commercial outcomes.
